                "@type": "Answer",
                "text": "When your air conditioner isn't cooling properly in Calhoun's hot
Georgia summers, the most common causes are low refrigerant, dirty coils, failing
capacitor, clogged air filter, or ductwork problems. Anderson's technicians perform a
complete diagnostic that includes checking your insulation and air sealing – because a new
AC won't cool well if your house is leaking air. Call (706) 629-0749 for fast, honest AC
repair."
            }
        },

                "@type": "Answer",
                "text": "A new high-efficiency AC only saves money if the rest of your home is
sealed and insulated properly. Many homeowners in Calhoun and Dalton replace their HVAC but
forget about air leaks, poor attic insulation, and ductwork issues. Anderson's whole-home
energy approach fixes the root cause: they perform a full energy audit, seal air leaks, add
insulation, and only then install or repair your HVAC system."
